

SPLASHBACK PRICELIST / 2014

Our splashbacks are priced according to both size and the design. Prices are calculated based on the area, and the range its from. There is a separate price table below for each of the design ranges.

By way of example:

Say you have chosen a design from the Wave collection. Find the width (in millimetres) along one axis of the table and the height along the other axis. This will lead you to a box which contains the price of a splashback in that size. So if your width is, say 900mm and your height is 700mm, just find 900 on one axis and 700 on the other, which will lead you to box showing you the price of £1,022.

If either of your dimensions are smaller than 600mm, for example 500mm, you need to read from the axis that says 150-600.

Please note that we can make splashbacks as large as 2100mm x 1200mm in one piece; if you would like a price for a size larger than shown in these tables please just ask.

If you have any problems calculating prices, please just call us on 01437 721357 or email us and we'll be pleased to assist you.

Design Range: Grasses

Bespoke Design Prices

Bespoke designs of splashback are priced according to the actual nature of the design as well as the size. Contact us to discuss your ideas and then we'll give you a quote.

Delivery

We deliver our splashbacks by personal courier, fully insured. The cost of delivery is determined by the location, and starts from £120.

Installation

Fitting the splashback is not difficult, but certain guidelines must be followed to ensure successful installation. Full instructions are provided with all splashbacks and a sufficient quantity of our recommended adhesive will be included. Alternatively we can arrange the installation for you – please contact us for a quote.
